

**Amendments to the Specification:**

On page 4, please rewrite the paragraph beginning at line 16 as follows:

Additionally, several other patents disclose single layer fabrics having plane differences; e.g. U.S. Patent ~~5,809,569~~ 5,806,569, U.S. Patent 5,839,478, and U.S. Patent 5,853,547. While all of these patents describe fabrics exhibiting a plane difference in the forming side, their single layer designs do not allow for the optimized balance between support and stability that multi-layer fabrics can provide.
